MaRRS

Committed to Empowering the Child

MaRRS creates 360° opportunities to enable the child outside the classroom: innovative learning strategies, technological innovations, training programmes through preschool to college and beyond.

MaRRS International Spelling Bee

DISCOVER the vocabulary of learning, confidence, and winning – at MaRRS International Spelling Bee

www.marrsspellingbee.in

MaRRS International Spelling Bee, the flagship product of MaRRS Intellectual Services (P) Ltd, is the world's largest self-motivated learning program for school children

MaRRS International Spelling Bee helps to build up every vital skill for language acquisition, vocabulary, spelling, grammar, word, sentence usage, and pronunciation. Focusing on these elements at every level, participants undergo a comprehensive evaluation, showing dramatic improvement. The competitive spirit nurtures performance without compulsion. Now in its twentieth year, students across the world hone their skills at this word marathon. MaRRS International Spelling Bee is accessible to students from classes 1 to 12, who compete in six categories. The competition progress from the School Level through the Interschool, District, State, and National Championships towards the International Level.

Motivated Learning Programs

Better Your English (English Through Spelling Bee)

An online Vocabulary and Fluency Development program.

www.betteryourenglish.xyz

The participants of the program will be provided with regular online English classes covering all aspects of English. They will also be prepared to participate in the MaRRS International Spelling Bee. All those who register for the BYE (ESB) Series will also be eligible to participate in all levels of the MISB conducted during the enrolment period free of cost.

All students will participate at all levels of the competition. There will not be any disqualification. They will also be eligible for prizes if they become winners at the competition.

All those registered will be eligible to participate up to the National Championship of the MISB without disqualification, free of cost. They will have to pay the fee to participate in the International Championship.

Better Your English

MaRRS International Math Bee

Unveil the intrigue of math

www.marrsmathbee.in

Mathematics, revered and feared for its abstract nature, is in itself a universal language; a language that marks the cornerstone of science and art. As Bertrand Russell desired, Mathematics is "to be assimilated as a part of daily thought, and brought again and again before the mind with ever-renewed encouragement."

The predicament of teaching and learning mathematics has been the overemphasis given to the arithmetic representation of math; hence, the conceptual significance of the subject has taken a backseat. An intriguing stimulus is adequate to provoke thinking among our young generation to motivate them in bringing the spirit of math to the fore.

The MaRRS International Math Bee is a wide-ranging math competition for school students organised by MaRRS with the objective of instilling an interest in mathematics among the youth. The comprehensive syllabus of the competition includes general and applied mathematics with an added emphasis on the theoretical and conceptual cognisance of the subject. The MaRRS International Math Bee is open to students from classes 1 to 8, classified into eight categories, depending on their class of study.

Motivated Learning Programs

MaRRS Math Buoy

Another program in line with the BYE(ESB) series in Mathematics, enables the students who register to participate up to the National Level of the MaRRS Math Bee Championship without disqualification. Regular training will be provided to sharpen the Mathematical Skills of the participants.

MaRRS Scientia Exertus

www.marrsscientiaexertus.in

Every invention has had its birth from an implausible idea. It took more than three hundred years for Da Vinci's flying machine sketches to be made into a reality by the Wright brothers. The neural network, on which all computation systems are modelled, is actually a parallel architecture of the human brain. Tax your brain to think farther than what is believable. Scientia Exertus, a national-level science competition, aims at inspiring curious young minds to think beyond the limits of prevalent notions. The program opens a window for the students to experience and introduce new ideas and thoughts that would pave the way to a dynamic world of scientific creativity and inventions.

Participants of Scientia Exertus will in addition to General Science also have a focused study on one topic in Science. The topic of study will be different for every class/category.

Motivated Learning Programs

MaRRS Science in Practise

This is similar to the Better Your English (ESB) Program, focussing on Science. All those who register will be eligible to participate in all the levels of the MaRRS Scientia Exertus competition up to the National Level. There will also be regular programs in science connecting the science they Learn to the latest developments in science.
